Collector.

SPECIAL REPORT

In 1957, at a cost of \$350.00, a much-needed road to Cherry Mountain Reservoir was constructed enabling us to drive a truck to the site.

The Little River water line right-of-way, which through the years has been grown over with underbrush and timber, has been located and spotted at an expense of \$150.00. We plan to cut this right-of-way in the near future. An engineer with proper instruments was engaged to locate the pipe line.

The near-flood waters late last fall unearthed a considerable amount of pipe at the new Little River Dam. Two hundred dollars in labor and material was required to remedy the damage.

Respectfully submitted,
OVILA LEDOUX,
Superintendent.

Health Report

Mr. Clayton J. Young, Town Clerk
Carroll, N. H.

To the Citizens of Carroll:

During the year 1957, five Salk Vaccine Clinics were held in Whitefield at the Morrison Hospital, sponsored by the N. H. State Department of Health, in cooperation with the local School Nurse, the P. T. A., and the Supt. of Schools. One hundred and thirty-seven children from Carroll attended these clinics, nine received first injections, 11 received second injections, and 117 received third injections.

To the best of my knowledge all the children attending school in the town of Carroll have received three injections.

In February, March, and April, Triple Toxoid Clinics for the Immunization of Whooping Cough, Diphtheria and Tetanus were held, and the following number of children completed their series of three injections:

Infants 2, Preschool 36, School 12, and Boosters were given to 11 children, and Vaccinations to 2 children.

It has been a pleasure to work with the Citizens of Carroll and at this time I would like to thank them for their cooperation, and at any time I hope they will feel free to call on me if I can be of any service to them.

Respectfully submitted,

ELEANOR KENNEY,
N. H. State Dept. of Health
Public Health Nurse for
Coos County.

School Warrant

THE STATE OF NEW HAMPSHIRE

To the Inhabitants of the School District in the Town of
Carroll qualified to vote in District Affairs:

You are hereby notified to meet at the Town Hall in said district on the eleventh day of March 1958, at two o'clock in the afternoon to act upon the following subjects:

1. To choose a Moderator for the ensuing year.
2. To choose a Clerk for the ensuing year.
3. To choose a Treasurer for the ensuing year.
4. To choose a Member of the School Board for the ensuing three years.
4. To hear the reports of Agents, Auditors, Committees, or Officers heretofore chosen, and pass any vote relating thereto.
6. To choose Agents, Auditors, and Committees in relation to any subject embraced in this warrant.
7. To see if the school district will adopt as its school check-list the Town check-list, as provided in RSA 197 : 12a, as inserted by Laws of 1957, chapter 57; this provision to be effective for the 1959 and subsequent annual district meetings.
8. To see if the School District will raise and appropriate a sum of money for painting the exterior of the school building.
9. To see what sum of money the district will raise and appropriate for the support of schools, for the salaries of school district officials and agents, and for the payment of statutory obligations of the district, and to authorize the application against said appropriation of such sums as are estimated to be received from the state equalization fund together with other income; the School Board to certify to the selectmen the balance between estimated revenue and the appropriation, which balance is to be raised by taxes by the town.

Given under our hands at said Carroll this twenty-third day of January, 1958.

VIRGINIA M. MORNEAU, Chairman
ROBERT G. THOMPSON

School Board Report

To the Citizens of the Town of Carroll:

The Annual Report of the School Board of Carroll is duly submitted to you.

We have been very fortunate in having this year as new teachers Mr. Lawrence Sturtevant as our principal, Mrs. Mary Young, commercial teacher, Mrs. Eileen Worsley, teacher of Grades IV-VI, and Mrs. Frances Hutchinson, teacher of Grades I-III, and Mrs. Vera Allen, science and mathematics teacher who was with us last year. We wish to thank all of our teachers for the fine cooperation they have given us this year. May we also thank Mr. Truell who has given so generously of his time in assisting us in making this year a successful one. We also want to thank the Parent-Teachers Association and the Grange for the help with the Dental Clinic and the Square Dance Program. Our appreciation also goes to Mr. Herbert Boynton who has been helping in the coaching of our school sports program.

During the past year the elementary room which is being used for Grades I-III was redecorated. All the floors in the school was resurfaced, sealed, waxed, and a thorough cleaning was done throughout. New desks and chairs were purchased for the high school room. There were minor repairs done on the roof, and the trusses of the gymnasium were tightened.

Your Carroll School Board has accepted the Federally Aided Milk Program. This means that children attending school may purchase a half pint of milk for three cents and the Federal Government will pay the other three cents toward its cost. At the present time milk is costing six cents per half pint to the consumer.

A loud speaking system was installed in the gymnasium this last spring. The school board also procured a movie projector which is very useful in school work.

During the past year we have lost the services of two members of the school personnel, Mr. John V. McGee, school custodian, and Mrs. Mary Spaulding, school nurse, who have served faithfully during the past twenty and four years, respectively. These vacancies have been filled by Mr. Edward Jordan and Mrs. Alice McGee.

The board regrets the resignation of one of our bus drivers, Mr. Philip McKenna who for the past seventeen

years has served so faithfully. Mr. Leo LaBrecque is finishing out Mr. McKenna's contract.

Members of the board wish to express their appreciation for the cooperation and help rendered by Mrs. Margaret Rines during her term of office.

We suggest that you read the reports submitted by the superintendent of schools and the principal regarding new state educational requirements.

Parents and townspeople are welcome to visit the school at any time.

Respectfully submitted,

VIRGINIA MORNEAU,
Chairman of School Board

Superintendent's Report

To the School Board of the Town of Carroll:

My fifth annual report as Superintendent of Schools in the Town of Carroll is submitted herewith.

Supervisory Union No. 31

The Supervisory Union No. 31 is composed of the towns of Carroll, Lancaster, and Whitefield. The duties of the Union, as a whole, are to select the Superintendent of Schools, special teachers, supervisors and the Union secretary. The school nurse is engaged separately by the individual towns. The Superintendent's salary for the school year 1956-1957 was apportioned as follows: Carroll 7%, Lancaster 35%, Whitefield 18.8% and the State share 39.2%. The salary of the Elementary Supervisor, secretary and office expenses of the Union for the school year 1956-1957 were apportioned as follows: Carroll 11.5%, Lancaster 57.5% and Whitefield 31%. These percentages are based on two factors having equal weight as follows: (1) Average Daily Membership of District, and (2) District Valuations (adjusted). The following chart might be of interest to show you how these percentages are derived:

District Valuations (Adjusted)

Carroll	\$ 2,738,393.00
Lancaster	8,828,497.00
Whitefield	4,928,190.00
	\$16,495,080.00

Average Daily Membership of Districts

	Elem.	High	Total
Carroll	55.2	15.8	71.0
Lancaster	549.0	208.0	757.0
Whitefield	286.2	112.1	398.3
	890.4	335.9	1226.3

District Percentages of Costs

	Valuation %	A. D. M. %	Average %
Carroll	17	6	11.5
Lancaster	53	62	57.5
Whitefield	30	32	31.0
	100%	100%	100.0%

Section 47 of Chapter 135 of the revised laws has been amended by the 1951 General Court to read, in part, as follows: "The basis for the apportionment shall be one-half on the average membership for the previous school year and one-half on the last adjusted valuation of the District."

The average percentages will vary slightly each year due to changes in the valuation of the districts and the average daily membership of pupils in the districts.

The Union School Board employs a full time elementary supervisor whose duty it is to aid and direct those teachers teaching Grade I through VI. This position has been in existence for approximately eight years. Miss Blanche Witherell, Supervisor of Elementary Education, does exceptionally well in aiding these teachers. Special programs relative to the progress of the pupils, both individually and as a whole, are carried on under her guidance. We recommend that her report be read and digested as we feel that this field of education should be understood by all interested parents and citizens.

School Personnel

The Carroll School District received the resignation of four of its teachers by the close of the school year 1956-1957. Mrs. Ruth Fisher, teacher of Grades I-III, Mrs. Grace Bailey, teacher of Grades IV-VI, Mrs. Mary Watkins, high school commercial teacher and Mr. Harry Peach, high school science teacher, resigned their positions effective June 30, 1957.

Mrs. Frances Hutchinson, graduate of New Haven State College, New Haven, Connecticut, was employed to teach Grades I-III; Mrs. Eileen Worsley, graduate of Keene Teachers College, was employed to teach Grades IV-VI. Mrs. Mary Young, graduate of University of New Hampshire, was employed to teach the high school commercial subjects; and Mr. Lawrence Sturtevant, graduate of University of Maine, was employed as principal and teacher of Social Studies.

Mrs. Vera Allen continues in the high school as teacher of science and mathematics.

Enrollment

The following table on present and future enrollments will show to some degree what the elementary attendance for the Twin Mountain School may be for the next five years. Whereas we may expect a more or less constant enrollment in our elementary grades, we must be cognizant of the fact that the high school enrollment varies continually.

**Anticipated Future Enrollment in Grade I
According to Census Reports
Five Year Summary**

Anticipated Enrollment Year	Year Census was taken (September)				
	1953	1954	1955	1956	1957
1957	11	16	17	12	
1958	6	5	9	6	7
1959	6*	11	9	7	5
1960		13*	20	16	16
1961			3*	5	8
1962				2*	4
1963					5*

* This figure includes only children born before September 1 of that calendar year as the census is taken at that time.

In last year's report given by the Superintendent of Schools, it was noted that in September there was an anticipated enrollment of twelve pupils. In September 1957 there were thirteen pupils enrolled in the First Grade. This number added to the ones already enrolled in previous years in Grades I and II gave an enrollment of twenty-eight in the first three Grades. This was an increase of seven pupils over the preceding year. However, it should be noted that this figure would have been much greater if the number of children reported in the 1955 census had enrolled. At that time it was estimated that there would be seventeen pupils enrolled in Grade I as of September 1, 1957. Whether the large enrollment of the first three Grades will continue for the next three years is unknown. At the present time there are only eighteen pupils enrolled in Grades IV through VI.

High School

The enrollment in the high school in Grades VII through XII was twenty-seven pupils as of September 1, 1957. This number continually fluctuates as there are many who leave school during the school year for varied purposes. Much has been said about the high school cost in previous years. Whether the town wishes to continue its high school in the future is within the hands of its citizens.

Several years ago the State Department of Education started a study to establish minimum standards for New Hampshire High Schools. The results of this study was given to all New Hampshire School Boards, Superintendent of Schools, and Principals recently. These minimum standards go into effect as of September 1958 if the school is to continue as an accredited high school. January 16, 1958, a

committee from the State Department of Education visited the Twin Mountain High School and made its survey. Its report was received by the Superintendent of Schools and given to the Carroll School Board on January 23, 1958. The committee's report follows:

REPORT ON VISIT TO TWIN MOUNTAIN HIGH SCHOOL

January 16, 1958

On January 16, the following staff members of the State Department of Education visited Twin Mountain High School: Mr. Charles Dolan, Mr. Paul Quimby and Mr. Roland Kimball.

The purposes of the visit were twofold: the first was to clarify what action is necessary in order to qualify Twin Mountain High School as an Approved Public High School under the Minimum Standards for New Hampshire Secondary Schools which will go into effect September 1958; the second purpose was to identify certain aspects of the school plant and program which are in need of attention if Twin Mountain is to offer a comprehensive high school program. Although many suggestions were presented orally to Superintendent Harold Truell and Principal Lawrence Sturtevant at the time of the visit, only the major considerations are detailed in this report.

The staff of our Department is available to assist in any appropriate manner as the community takes steps to implement the suggestions presented in this report.

Action Necessary Under Minimum Standards

1. In several respects the present program of studies fails to meet the Minimum Standards which will be in effect in September 1958. Specifically, the following points are noted:

- a. Only 19 academic subjects are included in the program of studies for the present year. The new Minimum Standards will require that the program of studies include at least 20 courses in the academic areas.
- b. A total of nine subjects in the vocational and practical arts areas now is included in the program of studies. The new Minimum Standards will require that at least 12 vocational subjects be taught. Because present vocational program is limited to work in the field of business education, the additional subjects should provide for opportunities for the boys in the area of indus-

trial arts and for girls in the area of home economics.

- c. During the present school year, a total of only 16 subjects are taught. The Minimum Standards will require that for any given school year a total of at least 20 subjects must be presented.
- d. The present program provides for just one opportunity in the area of fine arts education. This is in chorus. The new requirements require at least three opportunities in the fine arts area and the remaining two should be in the fields of instrumental music and general art.

2. In many respects the teaching loads presently assigned to the principal and the high school teachers exceed those which will be permissible starting in September of 1958.

- a. The new requirements stipulate that a high school principal must have at least 25% of his time free from teaching and study hall assignments in order to carry out his nominal administrative and supervisory responsibilities. Under the present schedule, the principal has only two periods per week for this purpose.
- b. The new Minimum Standards will limit the teaching load of any teacher to a maximum of six periods daily. In the present program, Mrs. Young is teaching 7 periods per day certain days of the week. It will be necessary to reduce this teaching load.
- c. A further requirement of the new Minimum Standards is that teachers of academic subjects can be assigned no more than 5 different academic preparations daily. Under the existing program, Mrs. Allen must make 6 different academic preparations each day. This teaching load must be reduced.

3. The school facilities and instructional equipment available for certain areas of the curriculum are not adequate. Unless they are substantially improved, it is probable that the high school will not be approved for purposes of instruction in these particular subjects:

- a. The present science laboratory is entirely inadequate. There is a lack of space, facilities for individual pupil experiments, gas, storage area, and basic equipment necessary for teaching a

- modern science course.
- b. The area now used for business instruction is likewise totally inadequate. It lacks adequate lighting, space, and equipment.
 - c. The community is reminded that, because there is not now an adequate school library, any plans for remodeling or expanding the existing high school will be approved only if they provide for the development of an acceptable school library.
4. At least 3 administrative practices must be reviewed and corrected in order for the school to be approved in September of 1958. These are as follows:
- a. The scheduling procedure which requires that pupils be excused from regular classes in order to have music instruction is unacceptable because the pupils will not have sufficient time in their regular classes to meet the time requirements for these subjects as established by the new Minimum Standards.
 - b. It will be necessary to establish clear cut administrative procedures which insure that the new graduation requirements will be met starting with the freshman class entering next September. These requirements are that each graduate complete four years of English, two years in the social studies (one to be in U. S. History), and one year each in science and mathematics.
 - c. In many respects the high school records concerning the individual students and graduates are not being kept up to date. It is necessary that all such records be properly maintained.

General Comments

The usual practice of our Department is to devote the second portion of this report to presenting a series of recommendations concerning steps which the high school ought to take to improve itself substantially beyond the requirements of the Minimum Standards. Because the situation at Twin Mountain is unique, this practice will not be followed. In our judgment the cost of bringing the school up to the Minimum Standards would be so exorbitant that the community should seek other solutions to the problem. It is our recommendation that careful study be given to the possibilities of joining with neighboring communities (1) to develop a co-operative high school for the area or (2) to work out tuition

arrangements that would result in the pupils of Twin Mountain attending a larger high school.

As this recommendation is considered, the following points should be kept in mind:

1. In order to meet the minimum requirements, it is almost certain that two or more teachers will have to be added to the high school staff.

2. In order to meet the minimum requirements, substantial modifications and additions to the present high school plant will be necessary. It will be necessary to consider the development of a new science laboratory, a business education room, a library, an industrial arts shop, etc. In view of the other circumstances indicated in this report, it does not seem justifiable to expend funds for this purpose.

3. There is no indication that in the years ahead the high school will grow substantially in size. This means that for the foreseeable future this school will have to maintain very small classes and therefore will incur an unreasonable per pupil operating cost.

4. The problem of obtaining and retaining qualified teachers will grow increasingly acute. The nature of the program at Twin Mountain High School will always make it necessary for teachers to handle a wide range of subjects and to accept many inconveniences not usually associated with high school teaching today.

5. Pupils learn from each other as well as from teachers and from books. It is abundantly clear that a 15 or 20 pupil high school does not offer the opportunities for co-operation and competition which represent the basic forces in the social and economic system of our nation.

6. There are many services commonly associated with a modern high school that are not now available at Twin Mountain High School. A few of these are:

- a. An adequate school library.
- b. An adequate program of pupil guidance services.
- c. An organized program in health and physical education.
- d. A program of school health services.
- e. A hot lunch program.

There is considerable evidence to support the conclusion that the citizens of Carroll are interested in the education of their children. It is equally clear that they are interested in the continuation of their school. It is unfortunate, but none the less true, that they must choose between these two concerns, for it is evident that to continue the school can only

result in offering their children an educational opportunity far short of what they deserve.

In conclusion, however, one point should be made emphatically clear. Even though it is the considered judgment of the New Hampshire State Department of Education that there is no justifiable reason for continuing to operate Twin Mountain High School, the services of this Department will be available to the citizens of Carroll as they study all of the various possibilities for providing an adequate high school education for their boys and girls.

Prepared by:

ROLAND B. KIMBALL

Acting Chief

Division of Instruction

Chairman, Visiting Committee

January 17, 1958

Insurance

This year your School Board, in conjunction with the Lancaster and Whitefield School Boards, once again offered to all pupils in these towns the opportunity of participating in a Special School Child Accident Policy for \$1.25 per pupil per year. This is the fifth year that the pupils have had this opportunity. Previous to this time the expense of an accident was borne directly by the parent. It is thought that this accident insurance policy will be a great help in meeting expenses which occasionally occur at school.

This policy became effective September 15, 1957 and will continue until September 15, 1958. Fifty-five out of seventy-three pupils and teachers took advantage of this opportunity. This shows that approximately seventy-five percent of the entire student body participated in the project.

Handicapped Children

By law, handicapped children who are unable to attend school have the privilege of being taught at home for a period of not less than two hours per week. Referring to the budget of 1958-1959, it will be noted that a sum of \$300 has been requested for this purpose. One cannot tell how much the expense of this item might be. There could easily be a greater demand for this service than we now anticipate during the coming year.

If you have a child who is handicapped and cannot attend school, feel free to contact the office of the superintendent of schools as he may be in a position to give assistance.

Repairs

During the school year 1957-1958 several necessary repairs were completed. May we suggest that you read the report of your School Board for information relative to repairs that were made during this period.

1955-1956 Special Appropriations

It will be remembered that in the 1955-1956 warrant there were three Special Appropriations made. Two of these Special Appropriations were completed and so reported in last year's school report.

Article No. 11 in the warrant for the school year 1955-1956: two hundred fifty dollars was raised and appropriated for the installation of an amplifier system for the gymnasium. This project has now been completed. Even though the cost amounted to more than the amount appropriated we were able to get it done for the two hundred fifty dollars. We feel quite certain that the parents and citizens of the town will appreciate this amplifier system.

Again we wish to express our thanks to the members of the Twin Mountain Parent-Teachers Association who have worked very hard during this past year for the good of the school. A good, active Parent-Teachers Association is an asset in any school. Its purpose has always been that of bringing the home and the school closer together.

It is also with sorrow that we learned of the death of Mr. John McGee. Mr. McGee had given of himself to the school for many years. The School Board and I wish to express sincere appreciation for all he did for the boys and girls attending the Twin Mountain School during the period he was custodian. Mr. Edward Jordan was employed to fill this vacancy and is doing very well.

Our appreciation goes to Mr. Lawrence Sturtevant, principal, and to all members of the Carroll teaching staff for the outstanding work which they have done and are doing during this school year. We know that all the teachers have the welfare of the pupils at heart.

It is also with regret that we heard of the death of Mrs. Mary Spaulding, who had been school nurse at Twin Mountain during the last five years. Both pupils and parents know that she was deeply interested in the school. She was constantly working to improve the health of all its members. The School Board and I express sincere appreciation for the fine work she did during her period of service. Mrs. Alice McGee was employed as school nurse to fill this vacancy.

Our appreciation also goes to Miss Blanche Witherell,

Supervisor of Elementary Education, for the splendid work and cooperation which she has exemplified during this past year. Parents are asked to contact her for any problem which might arise.

On behalf of the members of Carroll School Board, we wish to express to Mrs. Margaret Rines our sincere thanks for the outstanding work she performed while a member of the Carroll School Board. Mrs. Rines worked hard and diligently for the best interest of the school and its pupils. She gave much of herself to improve the Twin Mountain School system.

It is also with regret that the Carroll School Board accepted the resignation of Philip McKenna, school bus driver, who had to resign due to ill health. Mr. McKenna had been the school bus driver for many years. We wish to express to him our sincere appreciation for his loyal service rendered to the School District in the performance of his duties. Mr. Leo LaBraque was employed to complete Mr. McKenna's school bus transportation contract which expires June 1958.

May we express to the members of the Carroll School Board our most sincere appreciation for the exceptional cooperation which they have given your Superintendent of Schools. Their interest in the welfare of the pupils has greatly helped to improve the over-all school system. The citizens of the town have a right to be proud of its School Board members.

The present school philosophy is to develop proper habits, attitudes, ideals, and action patterns to enable those pupils attending the Twin Mountain School to live a happy and fruitful life in the communities of which someday they will become a part.

Do visit the school frequently.

Respectfully submitted,

HAROLD A. TRUELL,
Superintendent of Schools

Elementary Supervisor's Report

Mr. Harold A. Truell
Superintendent of Schools
Twin Mountain, New Hampshire

Dear Mr. Truell:

It is most gratifying to report the progress evident this year in our Reading Program. At Twin Mountain School a sincere interest in Reading is being created and the teachers are cooperating wholeheartedly with the policies and procedures of the program.

Not only do our children read better but also they are developing a good degree of independence in their reading activities.

The fascination of books is transferred to the Social Reading hour, too. The booklet, originally designed to aid the teachers in their choices of book selections for each reading group, has been reorganized. We hope this new arrangement will serve as a challenge for the child of unusual ability. This is the first step in what we expect will be a series of projects arranged primarily for encouragement of the gifted child. This type of child deserves our attention.

The Language objectives, recently established, have been reinforced by text-workbooks which we feel should give each child a good degree of basic English. Because we believe that correctness in English is just as important as accuracy in Arithmetic, we are trying to place special emphasis on neatness and efficiency in all written work.

In every subject there are procedures which cannot be mastered except through the use of persistent drill. Arithmetic falls especially into this category and we are continually urging that more drill be applied.

We have a wonderful group of young people in the Elementary grades; courteous, cooperative and ambitious. We want to inspire them to greater achievement and to develop in them the characteristics that build loyal and worthy citizens.

Our Parent Conferences are an important part of the school program. Parents, who are sincerely concerned with the education of their children, are taking advantage of this association. A conference with the teacher can discover the needs of the child and can disclose ways in which the parent, too, can share in the life of the school.

A goodly number of teacher workshops and discussion groups, conducted during the year, have provided opportunities to discover new ideas, consider the progress we have made and work with the other teachers of the Union to establish new goals of learning.

Our present teaching staff, (Mrs. Hutchinson and Mrs. Worsley), both of whom came to Carroll in September, 1957, are making outstanding contributions to the school. The objectives are to bring every child up to grade level and to make each one a responsible and contributing member of society. We welcome Mrs. Hutchinson and Mrs. Worsley. We wish also to express our thanks to Mrs. Bailey and Mrs. Fisher who initiated many excellent ideas and procedures during 1956-1957.

In loving memory of Mrs. Mary Spaulding we dedicate our efforts toward the achievement of a happier, healthier student body and we pledge to Mrs. McGee, the new school nurse, our loyal support.

We gratefully extend our appreciation to you, Mr. Truell, for the inspiration and encouragement you are always giving.

For the many hours of time and endeavor contributed by the School Committee members, in an attempt to supply all our needs and to create a cheerful atmosphere in which to work, we are most thankful.

For Mr. Sturtevant's help and for the understanding and cooperation of the parents and friends of the school, we say a hearty, "Thank you!"

And we appreciate the effort of our custodian, Mr. Jordan, to maintain a clean, attractive building for our comfort and convenience.

This report is respectfully submitted.

BLANCHE M. WITHERELL,

Supervisor of Elementary Education

Principal's Report

Carroll, New Hampshire
December 20, 1957

To the Citizens of the Carroll School District:

The report of the Principal of Twin Mountain School is hereby submitted:

School Staff

Lawrence M. Sturtevant, Principal	English, Social Studies
Mrs. Mary R. Young	English and Commerce
Mrs. Vera Currier Allen	Science and Mathematics
Mrs. Eileen Worsley	Grades four, five, and six
Mrs. Frances Hutchinson	Grades one, two, and three

English 9-10	12		

A complete turnover in the school staff occurred during 1957. Benefits, of any, accruing from these changes will only

reveal themselves in time. The persons comprising the present staff have all had very extensive experience with school children of all types. They have been very much challenged by the work confronting them during the first half of the school year, particularly at the secondary level.

Every attempt to maintain a normal, modern school program is being made by the teachers. Mrs. Allen has had several groups of children on field trips. Other groups have gone on hiking trips in connection with physical education and work on the yearbook. The seventh and eighth grades climbed Twin Mountain in the fall, and other enterprises of this nature are planned for the spring. One successful social has been held and others will be conducted during the year. With the assistance of Mr. Herbert Boynton, a basketball schedule is being drawn up and a team trained to play appropriate opposition. A Christmas program was presented to the public on December 19.

The obvious interest of Twin Mountain parents in the school is manifest to the most casual visitor. A minority of schools in the entire country are provided with as pleasant and spacious a playground. The gymnasium and public entertainment facilities are unique for communities of this size in northern New England.

However, as it is presently located, the lower grade playground equipment is not conveniently placed for supervision by the teacher. During the deep snow of winter it is out of commission almost altogether. A proper place for this equipment has been found on the north side of the building and in line with the windows of the present lower grade room. In this location the equipment could be easily observed by the teacher and be in use almost every day of the school year.

Ways and means of making the gymnasium more useful for physical education through appropriate gymnastic equipment should be explored in the near future. At present, gymnasium activity is largely confined to basketball and volleyball.

In conjunction with the physical education program, with the assistance of Mr. and Mrs. Donald Marshall, skiing at Cannon Mountain one afternoon a week is being planned for those students electing it at all grade levels. It is intended that this shall not interfere with the regular school program and all class work missed by the participants be made up outside of school.

The superintending school committee has authorized

the installation of a considerable amount of new equipment and supplies during the first half of the school year. This has included new desks and chairs, four new globes, a quantity of experimental equipment for science, new American literature texts, new reading books in American history, new uniforms for the basketball team and a fair amount of athletic equipment.

Traffic safety signs, requested for several years, have been provided by the Highway Department.

The Parent-Teachers Association has paid for several very fine magazines and helped to pay for a good quality air pump. During December this Association initiated a program of parent-teacher conferences at the secondary level for the purpose of discussing potentialities and prospects of the individual students. A beginning of a formal relationship of the science work in Twin Mountain School with the work being done at the Fairbanks Museum in St. Johnsbury, Vt. has been made; the Parent-Teachers Association arranged transportation for the first Museum expedition in December. The noon milk program initiated in October was first proposed and planned by the Parent-Teachers Association.

Through contacts of all sorts, staff members have been continuing their professional development during the first half year. Mrs. Vera Allen was a delegate in December to the annual meeting of The New England Association of Colleges and Secondary Schools in Boston, and also attended the joint meeting of Physics, Chemistry, and Biology teachers at Wentworth Institute. Mrs. Allen had attended meetings of the North Country Science Teachers Association, and the North Country Mathematics Teachers Association. Mrs. Frances Hutchinson has attended elementary sectional meetings in Lancaster and Whitefield. Mrs. Eileen Worsley has attended Intermediate sectional meetings in Lancaster and Whitefield. All staff members were present at the State Teachers Convention held in Manchester in October.

Mrs. Mary Young, through her experience in Twin Mountain School administration, has been of great assistance in the daily operation of the school.

In most of the fundamental academic fields, a student with ambition can learn as much in Twin Mountain School as in most other schools. We are seriously deficient in our scientific equipment and in our laboratory.

If our standard of living continues to rise in the coming years as in the past, information coming to the School indicates that skilled labor will be in high demand, with a de-

creasing call for common labor. Many students in our secondary classes at present demonstrate a greater potential for trade than for academic education. A study should be made of insuring the future of these students through encouraging them to go into trades. Several good trade schools are located in this vicinity. A boy of high school age with mechanical potential and little academic ability or interest is wasting much of his time in the type of school Twin Mountain is able to maintain.

Scientific events of the recent fall months will forever be remembered as a landmark in our educational history. The impact on educational philosophy and planning of the Russian achievement in space satellites has already been very great. In the next few years most of the children now in Twin Mountain School will come under the influence of these changes. To meet the Russian threat to our position as the leading world power, our schools at all levels will be asked to raise their academic standards, and to separate and train all students on the basis of their real aptitudes. Just as twenty years ago our political boundary moved in theory to the Rhine, so now we have at last found that our educational frontier is on the Elbe River. To stand idly by now, as then, could only spell disaster to the American ideals.

The staff of Twin Mountain School express their appreciation to the members of the School Committee, Mrs. Virginia Morneau, Mrs. Beulah Beaulieu, and Mr. Robert Thompson, to Superintendent of Schools, Mr. Harold A. Truell, Elementary Supervisor, Miss Blanche Witherell, Music Supervisor, Mrs. Ruth Wentworth, School Nurse, Mrs. Alice McGee, and Custodian, Mr. Edward Jordan, for the assistance they have given in helping to operate a successful school. The staff also wish to thank Mr. Herbert Boynton, who has assisted so ably with the basketball program, and the officers and members of the Parent-Teachers Association who continue, as in years past, to aid the teachers in their work in many material ways.

For the guidance of interested parents and other persons, specific information dealing with courses and requirements is submitted.

The following is the school program offered for the current year:

Subject	College	General	Commercial
Freshmen			
English 9	R	R	R
Algebra I	R	R

Principal

Report of Supervisor of Music

Mr. Harold A. Truell
Superintendent of Schools
Whitefield, New Hampshire

Dear Mr. Truell:

I hereby submit my annual report on the Vocal Music in Twin Mountain School.

It is our first duty and function to provide the children we guide with a sense of enjoyment in musical activities. In our music classes we try to have first of all, a period of fun through active responses to music. It is a period for the release of basic musical impulses rather than of factual concepts. During this period we may develop a sense of how music goes tonally and rhythmically.

When we have developed this sense of enjoyment in musical experience, we may consider a music reading readiness. It is the experience the children bring to a situation rather than what "he ought to be doing" at a certain time that means real learning. Every child is given the correct use of his "singing voice" from the lower grades right through high school. The fundamental rhythms of music are taught in the lower grades; the more complicated in the upper grades. Good habits of listening such as being attentive, quiet, discriminating and imaginative are also developed through all of the grades. The children are taught to notice, incidentally, by sight or sound the instruments of the orchestra and band. During the third and fourth grades syllable reading is pursued. In the fifth and sixth grades rounds are first sung as an introduction to part work.

Between fifty or sixty rote songs are taught in the first grade, and special attention is given to uncertain singers. Pure true tone production is emphasized. This work is carried up through the grades. A program for appreciation is presented through the use of records.

The different kinds of notes are taught, beginning in the second grade, as well as the corresponding rests. The teaching of rudiments of theory have been taught throughout the grades.

In Junior High "Folk Music" is being learned from the different countries; appreciation of many of the "classics" is accomplished through the use of records.

In the High School much time is being devoted to the

study of "Life with Music." This deals with the various types of instruments by which we can see or hear music produced. Quite intense study has been made of the different types of victrolas, since the first was invented, also different kinds of records used, modern popular composers, different types of bands and orchestras, soloists, vocal and instrumental.

The older group provided vocal music for the high school graduation. The elementary grades and the Junior High boys and girls contributed to a great extent to the Christmas program. The apparent enthusiasm and interest shown by the majority is very gratifying.

I wish to express my sincere appreciation to you, Mr. Truell and to Mr. Sturtevant, and the teachers, both in the elementary and high school, for the interest and cooperation that has been given me at all times.

Respectfully submitted,

Ruth C. WENTWORTH,
Music Supervisor

Health Report

Mr. Harold A. Truell
Superintendent of Schools
Whitefield, New Hampshire

Dear Mr. Truell:

I submit the following health report on the students from the period December 1956 to December 1957.

Seventy-two pupils were checked at the beginning of the year for general health, height, weight, and condition of the scalp. Most of the children appeared in excellent health.

Eleven pre-school children were given physical examinations and vaccinations in May 1957.

Since some of the children were found to be underweight and it was thought that all would benefit, a school milk program was initiated this fall.

All children were examined by Dr. William D. Monahan in October. Since most of the children are in good health, we are trying to stress cleanliness and good nutrition in the health program this year.

There were five Polio clinics held this past year with a total of ninety-five shots given.

Dental clinics were held every Tuesday morning from January 1957 to March 1957. Seven pupils had dental work completed. It is regretted that we are unable to continue the clinic this year.

In April all children were given Tuberculosis patch tests. This was followed by a chest X-ray clinic for nineteen pupils with positive reactions. No active cases were discovered.

Visual Acuity tests were given to all children. Seven have had corrections and more are anticipated in the near future.

The Maico Audiometer tests were given and no defective hearings were discovered.

There was one case of mumps this fall and a large incidence of flu in October. Two children were out for some-time with complications.

I have made twenty-nine home calls this fall. Since this is my first year of school nursing, I have enjoyed meeting many of the parents for the first time and I appreciate their cooperation.

Miss Annette Eveleth, State Director of School Health Services, visited our school in October to discuss our Health Program.

A conference for new school nurse-teachers was held in Concord in September. I was able to attend this meeting and derived a great deal of benefit from it.

I wish to thank Mr. Truell, the members of the School Board, Mr. Edward Jordan, school custodian, and especially the School Faculty for their cooperation and help in this first year of my school nursing.

Respectfully submitted,
ALICE McGEE, R. N.,
School Health Nurse.
